UROVO Enterprise Enabler (UEE)

On-Device Inference | 95%+ OCR Accuracy | Real-Time Vision Analytics

UROVO UEE integrates Mobile Device Management (MDM), Mobile Application Management (MAM), and Mobile Content Management (MCM) into a single platform. It provides batch deployment, status monitoring, configuration updates, app management, data collection, and remote wipe across the full device lifecycle — helping enterprises reduce PDA management costs by over 50% and double operational efficiency.
